

How do we ensure safety in our premises during the Covid-19 pandemic?

We are committed to provide a safe environment for our visitors and personnel. By following these procedures, we ensure that all program modules and meetings are safe to attend.

Arrival

Please reserve enough time for your arrival, and keep a safe distance to others when entering the building. Please note that elevators can only carry one person at a time.

Hand hygiene

Please wash your hands meticulously e.g. when arriving from outdoors, before and after meals. We also have several points around our premises for disinfecting your hands. In the bathroom facilities we have soap, hand disinfectant, and disposable hand towels.

Moving around

We recommend our guests to stay mainly inside own training facility and its immediate proximity, avoiding unnecessary stay in the common areas. There will be other visitor groups in our premises during the training day.

Safety distance

Our training facilities have been arranged so that a two-meter safety distance is maintained while seated. We recommend that during the day, a minimum of one-meter safety distance is maintained in relation to other guests, faculty, and personnel in all situations. Only a few people are allowed in the bathroom facilities at a time. Please maintain the safety distance also in the queuing situations outside the facilities.

Catering personnel

Kitchen and catering personnel use gloves and respiration masks while preparing and handling food items.

Catering

During the pandemic, food is served either as individual portions or at a buffet, depending on the guidelines currently in effect. We change service utensils often and disinfect surfaces frequently. We request to adhere to safety distance when fetching and eating the food.

Cleanliness

We take extra caution in disinfecting the bathroom facilities, door handles, and surfaces such as coffee machine touch screens during the day.

Symptoms

If you suffer from even mild symptoms such as respiratory difficulties, fever etc. known Covid-19 symptoms, we request you to take part in the training online. If you experience symptoms during the training day, please consult our staff. In the case of symptoms occurring, we kindly ask for an immediate departure due to the risk of infection.
